DISCUSSION ITEMS:

Deseret Morning News Article –
An Outrageous Position

Reviewed, with no further action taken.

2007 Legislature – Statute Changes

Mr. Ormond explained that there were two bills proposed at Legislature this year, which might affect this profession.

House Bill 143 proposed to make Ephedrine, Pseudoephedrine, Phenylpropanolamine, and Norpseudorphedrine, Schedule V controlled substances is:

“Any compound, mixture, or preparation containing any of the following limited quantities of narcotic drugs, or their salts calculated as the free anhydrous base or

alkaloid, which includes one or more non-narcotic active medicinal ingredients in sufficient proportions to confer upon the compound, mixture, or preparation valuable medicinal qualities other than those possessed by the narcotic drug alone:

- (i) not more than 200 milligrams of codeine per 100 milliliters or per 100 grams;
- (ii) not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams;
- (iii) not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams;
- (iv) not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit;
- (v) not more than 100 milligrams of opium per 100 milliliters or per 100 grams;
- (vi) not more than 0.5 milligram of difenoxin and not less than 25 micrograms of atropine sulfate per dosage unit; and
- (vii) unless specifically exempted or excluded or unless listed in another schedule, any material, compound, mixture, or preparation, which contains Pyrovalerone having a stimulant effect on the central nervous system, including its salts, isomers, and salts of isomers.

Mr. Ormond also explained that House Bill 112 had passed both the House and Senate, and is currently waiting for the Governors signature, to sign it into law. He further explained that this bill, emulates the Federal Combat Methamphetamine Epidemic Act of 2005 (Title VII of Public Law 109-177). The Utah Controlled Substance Act, 58-37c, will be amended to bring Utah into compliance with the Federal Law, some of the changes will be:

- Possession of more than 9 grams of Ephedrine, Pseudoephedrine, or Phenylpropanolamine, by an unlicensed person, is a class A misdemeanor.
- Limits have been placed on the retail sale of Pseudoephedrine products from a "Mobile retail vendor" only allowing sales

of 3.6 grams within a 24-hour period, and
7.5 grams during a 30-day period.

Mr. Ormond then reminded the Board that the changes would not effect what this Division does. He explained that if a licensee is found to be in violation of the Federal Law, the Division does not enforce it; we will in turn take action against the persons or companies license with us.

Mr. Ormond commented that the law changes might not completely resolve the Meth (Methamphetamine) problem within this state. However, his understanding is that each year there was fewer Meth houses found. Mr. Tenney stated that he felt the law changes were making a difference, the remainder of the Board agreed.

Mr. Glanville told the Board that he had picked up a very informative magazine, dealing with different drugs and how they affect the user. Mr. Ormond commented that he would attempt to obtain a copy for each Board member.
